HEAT SHRINK ASSORTMENT KITS

When connecting wires, heat shrink offers a great neat way of protecting, insulating, organising & preventing any short circuits. It is a great alternative to electrical tape & allows you to slip over joined wires and then shrink with heat to cover up the exposed copper of the cable.

Each kit contains between 95 to 100 pieces and has 7 different sizes to choose from. Ranging from 1.5mm to 20mm.

Available in 3 convenient colour kit styles.

Heat Shrink Coloured Assortment Kit

Part Number: HS1006

- Total of 95 pieces thin wall and housed in a handy clear container.
- From size 2.5mm to 20mm.
