

Brembo Premium Brake Fluid

Brembo Premium brake fluids have a higher boiling point that exceeds the standard, thus offering superior resistance to Vapour Lock and ensuring braking efficiency even at low temperatures.

With high anti-corrosion properties and resistance to oxidation, Brembo brake fluid also allows for long-term unaltered operational characteristics of the fluid in operating circuit; therefore, preserving brake performance.

DOT 4

DOT 4 L.V.

DOT 5.1

Has an extremely high boiling point and lower viscosity than required, it meets and greatly exceeds regulatory standards. Also suitable for vehicles with ABS.

500ml

Part No: L04005

1Litre

Part No: L04010

Recommended for the latest generation vehicles with electronic control of braking systems and stability such as ABS, ESP, ASR, TCS, EBD, it is characterised by having extremely low viscosity.

1Litre

Part No: L04210

With superior characteristics for resistance to high temperatures and viscosity value, it is recommended for high-performance vehicles, including vehicles with ABS.

500ml

Part No: L05005

1Litre

Part No: L05010
