

# Can Shaped Pure Sine Wave Inverter

## Pro-Wave 150W

- **Can shaped housing for cup holders**
- **Powerful 2.1A (5V) USB port**
- **Power small household appliances**

PW150, The smallest model in the Pro-Wave range of pure sine wave inverters, has received significant upgrades to make it more functional and user friendly.

The ultra-portable 150W inverter, designed for powering and charging small household appliances on the go, such as laptops, tablets, cameras, mobile phones and electric shavers, has been physically transformed into a cup holder friendly housing for secure placement and convenient access inside a vehicle.

In addition to this, the unit has been fitted with a powerful 2.1A (5V) USB port that will quickly charge phones and tablets, or power portable devices such as GPS and dash cameras while the inverter occupies the accessory socket with its heat resistant plug and 600mm fuse protected lead.

Unlike modified sine wave inverters, pure sine wave inverters convert 12VDC power into 240V mains power without static interruption, making them ideal for more sensitive appliances such as AM radios, medical equipment and fluorescent lighting.

Part No. PW150

### **SPECIFICATIONS:**

**Input:** \_\_\_\_\_ 12V 15 Amp Max

**USB Output:** \_\_\_\_ 2.1 Amp (5V)

**Output:** \_\_\_\_\_ 240V AC 50Hz

**Wave Form:** \_\_\_\_ Pure Sine Wave

**Output Power:** \_\_ 150W Continuous  
300W Peak
