

SMART 8 SWITCH PANEL

The HULK Professional Series Smart 8 Switch panel is ideal for 4WD's, SUV's, Caravans and Trucks. This system allows you to control up to 8 different auxiliary LED light or electrical devices.

Part Number: HU1300 (Blue Backlit Panel)

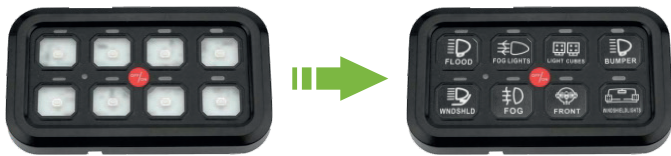

Part Number: HU1301 (Green Backlit Panel)

With 3 programmable switch functions (Toggle, Momentary, Pulsed) possible in every key, each output can be tailored to your own personal settings, including a choice of 60 self-adhesive labels.

Compact in design, this 8 Switch Panel operates at 12V / 24V DC and comes with a full accessory kit for complete installation, including spare 60A fuses for the main power supply.

The HULK Professional Series Smart 8 Switch has a built in ON/OFF master switch panel that will automatically adjust the back lighting to "Night Mode". It is also available in your choice of Blue Illumination (HU1300) or Green Illumination (HU1301).

The small RED wire connects to an ACCESSORY circuit in the vehicle. This configuration allows the outputs to be DISABLED when the Key ACCESSORY is OFF. For Anytime Operation, connect the small RED wire to the positive stud on the device.
