

THE POWER OF

REDARC[®]

Lithium Batteries

REDARC are pleased to announce the launch of a range of 12V Lithium (LiFePO₄) Deep Cycle Batteries targeted towards the caravan, camper trailer, 4WD, off grid and trucking markets.

REDARC Lithium Deep Cycle Batteries are the ultimate in deep-cycle battery technology delivering unrivalled performance and battery life. Each battery is equipped with an internal Battery Management System (BMS) that can monitor and optimize each cell during charge and discharge to protect the battery pack from over charge, over discharge and short circuit. The internal BMS also allows the balancing of cells within the batteries, allowing them to be configured and used in parallel to increase battery bank capacity for increased energy storage.

REDARC Lithium Deep Cycle Batteries are the perfect choice to be used in conjunction with other REDARC products, including RedVision, The Manager30 and BCDC In-Vehicle Chargers, and all Batteries come with a 3-year warranty.

FEATURES

- 3 Year Warranty
- Available in 60ah, 100ah and 200ah variants
- Built in battery management system (BMS)
- Can be configured in parallel connection
- Recommended for use with other Redarc products, including TVMS, BMS & BCDC
