Introducing the ArkPak One-Touch USB Light

An inexpensive, one-touch LED/USB Light that runs off any USB socket! Designed by the same boffins that came up with the ArkPak, this versatile, bendable, USB LED Light, offers both one-touch "on-off" and variable "dimming" functions with just one touch of your finger on the top of the light!

With extra low power consumption it is ideal as a camping light, night-light, a reading light or a laptop light – and will last for over 1000 hours running off an ArkPak (assuming a 130ah deep cycle battery).

One-touch dimming

Up to 12 lumens

Plugs into any USB port
