RS2 SERIES DOUBLE ISOLATED 12 VOLT, 2000 WATT INVERTER

Part Number: R-12-2000RS2

**NOW AVAILABLE FROM
COOLDRIVE AUTO PARTS.**

THE POWER OF
REDARC

The REDARC RS2 Series Pure Sine Wave Double Isolated Inverters have been tested and certified in accordance with AS/NZS 4763. The AC Output Active and Neutral are isolated from the DC Input Supply and Chassis Earth by double insulation. The output earth pin is not connected to ground, it is floating.

Producing a pure sine wave, REDARC's RS2 Series inverters ensure smoother, more efficient running of appliances including laptops and phone chargers, power tools, heaters, kettles and more.

REDARC RS2 Series inverters have a wide input voltage range for both 12 and 24 volt models across a broad range of output power wattages. They work comfortably anywhere, even in Australia's harshest conditions.

Features:

- AS/NZS 4763 compliant.
- Double Insulated to provide enhanced user safety.
- Take all the comforts of home whilst you travel.
- Appliances will run smoothly and efficiently, producing less heat and noise.
- Six models in each of 12 and 24 Volt inputs to be progressively launched from March 2019.
