

# Just Released 2 New Engine Oils

To obtain greater coverage in the late model Australian vehicle car parc, CoolDrive has made available two new products from world class lubricant manufacturer PETRONAS. The products are formulated with the proprietary CoolTech™ formulation that is proven to dissipate heat away from critical engine components for extended engine life.

Part Number: 70542K1YEU

PETRONAS Syntium FJ 5W-30 is specifically formulated to meet or exceed ACEA C1 & C2, JAGUAR JLR.03.5005 and has OEM approval FORD WSS-M2C934-B. Popular applications include Mazda3, Mazda6 & CX3 with diesel engines, Jaguar XF and many Range Rover models. This product is low SAPS and is also suitable for use for vehicles with DPF's (Diesel Particulate Filter).

Part Number: 70543M12EU

PETRONAS Syntium RN 5W-30 is specifically formulated to meet or exceed ACEA C4 and carries OEM approvals MB-Approval 226.51, MB-Approval 229.51 & Renault RN0720. Popular applications include Nissan Navara with YD25 D40 Diesel and all vehicles where a C4 product is recommended or required by the manufacturer. This product is low SAPS and suitable for use for vehicles with DPF's (Diesel Particulate Filter).

Always consult your vehicles handbook for the correct lubricant recommendations or utilize the iShop vehicle registration search and select service parts oils & filters to obtain the correct lubricant match to your vehicle. The use of lubricants not recommended for use in a particular engine can result in accelerated wear and ultimately engine failure or blockages in DPF's leading to costly repairs.
