## **Jaylec LED Combination Lamps**

**Stop/Tail/Indicator and Reverse Lamp functions, Part No. LS9015 (Packet of 2)**

**LS9015**

This new Jaylec LED Combination lamp has an advanced lens and optic design. Surrounded by Reflex Reflectors, there are 6x High intensity SMD LED's each for the Stop/Tail and Indicator lamps functions and 9x SMD LED's in the Reverse lamp function. The SMD LED's in the LS9015 Combination lamp have an inner chrome reflector housing surrounding them, they are rated up to 10,000 hours lifespan and all functions of this combination lamp are ADR compliant.

The Black ABS Plastic housing has a robust polycarbonate lens that covers the LED's and 500mm long 5 Core pre-wired sheathed cable assembly. Current draw is very minimal and they are IP67 Rated, meaning that these fully sealed lamps are waterproof, shock proof and dust proof.

Being a 9 – 33 Volt Multivolt unit, their compact and slimline design allows the LS9015 Combination lamps to be installed into tight spaces for a large variety of applications. They measure 191mm length x 49.5mm width x 28mm depth and the centre to centre mounting holes measurement is 174mm.

They are supplied as a pair in an attractive Jaylec blister pack.
