PROFESSIONAL AUTOMOTIVE SOLVENTS FOR ALL VEHICLES!

FSC-200

FSC-200 INDUCTION CLEANING TOOL is for cleaning Diesel Induction systems to overcome loss of performance in engines due to contamination deposits from emission devices such as Exhaust Gas Recirculation (EGR) Valves which greatly restricts air flow to the engine. The diesel cleaners **420DSC-A** and **420DSC-B** used in this tooling will remove contamination build-up in the induction system to restore vehicle performance. **413TB**, used in the **FSC-200** tool will clean throttle body and induction systems on petrol engines to maintain the correct flow to the engine.

413R ■ 250mL

413R FUEL SYSTEM ADDITIVE is added to the fuel tank when servicing the vehicle to ensure your fuel system components are maintained in top condition. It is suitable for ALL petrol engines including the latest Gasoline Direct Injection systems. It is a powerful fuel system cleaner and guaranteed to absorb and remove any moisture from the system eliminating problems for the vehicle owner. The 250mL bottle treats up to 100 litres of petrol.

1223 ■ 250mL

1223 DIESEL SYSTEM CLEANER is used in conjunction with the **420P** additive when servicing client's vehicles. Prior to fitting the new diesel filter on the vehicle, fill the filter with **1223** and then fit onto the engine or vehicle. **1223** in its undiluted form will offer the ultimate in cleaning from the filter to the injector pump, rail and injectors to restore injector spray patterns and flow rates. After combustion the **1223** will greatly assist in cleaning all the way back to the diesel particulate filter.

420P ■ 500mL

420P DIESEL CARE & CURE ADDITIVE is the ultimate cleaner for ALL diesel fuel systems including the latest Common Rail Injection, to maintain the system components in top condition. It has a built-in biocide to kill and protect against Algae Bacteria infections which occur with moisture in the fuel system. Added into the fuel tank when servicing the vehicle to clean the entire fuel system. The 500mL bottle treats up to 500 litres of diesel.

413EF ■ 250mL

413EF ENGINE OIL FLUSH is an advanced hydrocarbon cleaner suitable for all internal combustion engines to clean the entire engine internal components. Draining the oil does not remove all contaminants and when new oil is added it is immediately contaminated by the traces of sludge and debris left in the engine.

INTERJECT

PROFESSIONAL AUTOMOTIVE SOLVENTS FOR ALL VEHICLES!

THE INTER-JECT COOLANT ADDITIVES will clean and protect your radiator, heater core and complete cooling system to prevent overheating and breakdown.

COOLANT FLUSH 420CF is a revolutionary non-acidic flush that is added to the cooling system 20 minutes before flushing. This will assist in dissolving corrosion, sludge and oil contamination.

ELECTROLYSIS ARRESTOR 420E will coat, clean and lubricate the coolant system so it will not act as a battery cell. This will eliminate electrolysis. Used in conjunction with the Voltage Sponge IJVS, this will give the coolant system total protection against electrolysis.

BEFORE
AFTER

413R	250mL	FUEL SYSTEM ADDITIVE: FOR ALL PETROL ENGINES. ADD TO THE FUEL TANK AT EACH SERVICE.
414R	5L	
415R	20L	
414Y	5L	FUEL SYSTEM CONDITIONER: FOR ALL PETROL ENGINES. FOR TECHNICIANS WITH AUXILIARY SERVICE EQUIPMENT (E.G. DISCONTINUED LB291 TOOLING).
415Y	20L	
418/5	500mL	MACHINE CLEANER: FOR ALL PETROL ENGINES. FOR TECHNICIANS WITH AUXILIARY SERVICE EQUIPMENT (E.G. DISCONTINUED LB291 TOOLING).
418	5L	
419	20L	
1223	250mL	DIESEL CARE CLEANER: FOR TECHNICIANS WITH AUXILIARY SERVICE EQUIPMENT (E.G. DISCONTINUED LB291 TOOLING).
421/5	500mL	
421	5L	
422	20L	
420DPF	500mL	DIESEL PARTICULATE FILTER CLEANER: ADD TO THE FUEL TANK.
413EF	250mL	ENGINE OIL FLUSH: FOR ALL ENGINES.
415EF	20L	
410	100mL	DIESEL INDUCTION CLEANER: SPRAY BOTTLE. THIS IS A HYDROCARBON PRODUCT.

420CF	500mL	COOLANT FLUSH
420E	500mL	ELECTROLYSIS ARRESTOR: FOR ALL COOLANT SYSTEMS
IJVS	1	VOLTAGE SPONGE
415BC	20L	BRAKE CLEANER
415PBC	20L	PREMIUM BRAKE CLEANER
FSC-200	1	INDUCTION CLEANING TOOL
420DSCAB	500mL	DIESEL INDUCTION CLEANER: FOR USE IN FSC-200 INDUCTION CLEANING TOOL.
413TB	250mL	PETROL THROTTLE BODY & INDUCTION CLEANER: FOR USE IN FSC-200 INDUCTION CLEANING TOOL.
415IFC	20L	INJECTOR FLOW CHEMICAL: FOR USE IN ON-BENCH INJECTION UNIT
410NCC	125mL	NUCAR MIST DEODORISER & DISINFECTANT: USED IN MISTING MACHINES.
410NCS	125mL	NUCAR MIST DEODORISER & DISINFECTANT SPRAY: THIS IS A HAND APPLICATION PRODUCT.
