

ARMAX SNORKEL

Part Number:
SS792HPGD
SS792HPVD

Designed & Made in Australia. Established 1981

SAFARI'S NEXT GENERATION ARMAX AIR RAM RELEASE DATE: OCTOBER 2024

The Safari Snorkel is the ultimate protection against water, dust and snow ingress. The Safari Snorkel delivers cool, clean air to your vehicles engine. The new Armax Design is the start of a new generation of raised air intakes from Safari 4x4 Engineering.

These snorkels are all new designs to optimise airflow whilst remaining a watertight raised air intake. This ensures that if the vehicle owner wishes to increase their vehicles engine performance (utilising Engine Management and Exhausts), this product will provide the necessary airflow required.
