## INSPECTION CAMERA WITH 4.3" DISPLAY

The Aerpro Bullant G9100 Inspection Camera with large 4.3" colour LCD display is the ideal tool for inspecting hard to reach places. The small 5.2mm waterproof camera with LED light is mounted on a 1.0m flexible shaft, allowing the camera to be positioned virtually anywhere. It has many applications including; viewing around the vehicle engine bay, finding hidden pipes and cables behind walls, identifying blockages in pipes, vents and more.

The included attachments can be used to retrieve rings, bolts, nuts and other small items that have fallen into gaps or crevices. This inspection camera can also record footage and take images for future playback and viewing when a micro SD card is installed (not included).
