

PETRONAS Tutela

AUTOMATIC TRANSMISSION FLUIDS

One of the major gripes of workshops is the huge range of fluids that need to be sourced to service the many OEM Automatic Transmissions encountered in the workshop.

Automatic Transmission is an area of regular frustration as multitudes of products from different suppliers are currently required to be compatible with the relevant OEM approvals and fluid service refill recommendations. CoolDrive Auto Parts has introduced Petronas ATF fluids designed to reduce inventory and service more vehicles utilising fewer products.

PETRONAS TUTELA

MULTI ATF 700

20L 76151R41EU

200L 76151251EU

A state of the art, ultra-high quality, fully synthetic, low viscosity automatic transmission fluid.

Suitable for a wide range of vehicles utilising torque converter technology. Multi ATF 700 is a low viscosity ATF that due to extensive road and bench testing is suitable for virtually all modern Automatic transmissions up to and including 9 speed. Approved by GM for GM DEXRON®-VI & Ford for FORD MERCON® LV it is also backward compliant to a range of older specifications. Compatible with a host of transmissions by major manufacturers including ZF for many European vehicles. Petronas Multi ATF 700 reduces the inventory required to service a wide range of modern US, European & Asian vehicle transmissions encountered in the workshop.

PETRONAS TUTELA

MULTI ATF 500

18L 76149P41MY

For Dexron VI, Ford Mercon & Power Steering applications

A high quality ATF suitable for automatic transmissions up to and including 6 speed units from GM and along with many 4 & 5 speed Asian & Korean vehicle automatics is Petronas Tutela ATF 500. Approved by GM for GM DEXRON®-VI. ATF 500 is approved for transmissions that require JASO M315-2013 1A, JASO M315-2013 2A & AISIN WARNER JWS 3309. Petronas Multi ATF 500 will reduce the inventory required to service a wide range of 3, 4, 5 & 6 speed transmissions in the workshop as the fluid is backward compliant with many older specifications. Also suitable for Power Steering and hydraulic systems where GM DEXRON®-VI & Ford Mercon including previous levels of performance are required.

PETRONAS TUTELA

MULTI CVT 700

1L 76153E17MY

18L 76153P41MY

Fully synthetic for Continuously Variable Transmissions

CVT (continuously variable transmissions) popular in Nissan with Xtronic & Subaru with Lineartronic are now workshop serviceable with the introduction of Petronas Tutela Multi Cvt 700 fluid. Virtually all belt and chain driven CVT's are compatible with the new fluid including Audi Multitronic CVT transmissions. An Ultra high quality fully synthetic fluid that gives superior coverage & eliminates the need for multiple CVT fluids from different manufacturers.

PETRONAS TUTELA

MULTI DCT 700

- 1L 76160E15EU
- 20L 76160R41EU
- 200L 76160251EU

Fully synthetic for Dual Clutch Transmissions

DCT (Dual Clutch Transmission) known as DSG (Direct Shift Gearbox) in Volkswagen vehicles are now workshop serviceable with the introduction of Petronas Tutela Multi DCT 700 fluid.

Virtually all wet clutch DCT Transmissions including VW 6 & 7 speed, BMW DriveLogic 7 speed & Ford PowerShift transmissions are compatible with the new fluid. An Ultra high quality fully synthetic fluid that provides superior coverage for a wide range of vehicles utilising DCT technology.

PETRONAS TUTELA

ATF D3

- 4L 76127K12MY
- 18L 76127P41MY
- 200L 76127551MY

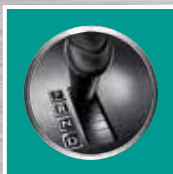

Suitable for Dexron III, Ford Mercon & Power Steering Applications

A very high quality ATF suitable for older automatic transmissions up to and including 4 speed units from GM & Ford along with a host of Asian automatics is Petronas Tutela D3. Meets or exceeds GM DEXRON®-IIIG/-IIIH & FORD MERCON®. Tutela D3 is approved for transmissions that require JASO M315-2013 1A & JASO M315-2013 2A approved products. Tutela D3 also covers Allison specification C-4 so is suitable in hydraulic systems in a host of off highway equipment. Tutela D3 is also suitable for Power Steering Systems that require a fluid that meets the GM DEXRON®-IIIG/-IIIH specification.

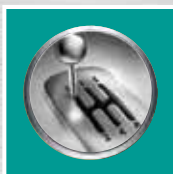

FINDING YOUR WAY AROUND THE NEW PETRONAS TUTELA RANGE

Dedicated fluids for different types of Transmission Systems... The new transmission fluid range has been designed around the different types of Transmission Hero and their specific protection needs.

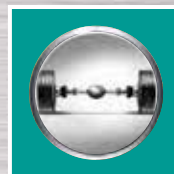

ATF

Automatic Transmission Fluids for Automatic Transmission Systems, covering Planetary Step ATs, CVTs and wet- DCTs.

MTF

Manual Transmission Fluids for Manual Transmission Systems, also covering automated MTs and dry-DCTs.

AXLE

Axle Fluids for Axle, Differential and Final Drive Systems.

Note: Axles with limited slip differential and controlled clutches require specialist fluids.

GEAR

Gear oils that are normally used in Manual Transmission and Axle Systems of older vehicles requiring simple GL-4 or GL-5 mineral oils.
