THE POWER OF

REDARC[®]

SHOWROOM CHARGER

Ideal for use in vehicle showrooms, or at home connected to infrequently used vehicles, motorbikes or boats.

Part No: SBC1230-S

Features:

- 12V 30A long-term AC maintenance charger
- Connect and forget battery power when you need it
- Detachable cables for easy concealment of the charger while in use
- No fan for discreet, silent operation

REDARC is set to release the 12V 30A Showroom Charger by DEFA. The Showroom Charger is designed for long-term battery maintenance charging, providing battery power when you need it.

The Showroom Charger is designed for simplicity – simply connect the clamps to the battery, plug into 240V mains power, then press the power button of the unit to switch on.

Designed for use with 12V Lead Acid, AGM, EFB and GEL battery compositions, the Showroom Charger will initially deliver 14.4V to achieve maximum charge, prior to dropping to 13.6V at a maximum of 32A during the long-term charging phase.

REDARC have partnered with Norwegian manufacturer DEFA, with both companies sharing similar values and focusing on continuous improvement, innovation and most importantly providing customers with great products of the highest quality.
