

REVERSE CAMERA TO SUIT FORD TRANSIT VAN 2013 - ON

Part Number: G163V

Reverse camera installed (high level brake light)

The Gator G163V is a vehicle specific reverse camera built for your Ford Transit. The camera simply replaces the high level brake light at the rear of the vehicle to provide a discreet installation solution without the need to drill any additional holes. The wide 120 degree field of view minimises blind spots at the rear of the vehicle and the CMOS image sensor coupled with the integrated infrared LEDs produces crystal clear images and enhanced performance in low light. The G163V is built tough! It will withstand the harsh environment thanks to its IP69K rating and its operating temperature range of -40 degree to 80 degrees Celsius. The Gator G163V is the perfect reverse camera solution for Ford Transit Vans.

Features

- Replace the high level stop light at the rear of the vehicle
- No additional holes need to be drilled into the vehicle
- High quality image sensor produces clear images and enhanced low light performance thanks to the integrated infrared LEDs
- 120 Degree field of view minimises blind spots at the rear of the vehicle
- IP69K Rating and wide operating temperature range makes it suitable for use in the harsh Australian conditions
- Mirror image allows camera to be utilised as a reverse camera
- 10.35m total cable length to run between the front and back of the vehicle
- Suitable for connection to PAL compatible aftermarket display monitors with RCA connection
