THE POWER OF **REDARC**[®]

TOW-PRO™ WIRING KITS

To support the installation of the Tow-Pro™ Elite electric brake controller, Redarc is releasing a range of vehicle wiring kits. In total 9 kits, directly compatible with 14 popular 4WD vehicles will provide 'Plug and Play' connectivity by providing the location to interface with the vehicle, simplifying the installation process. Each kit comes with the complete range of hardware and instructions required to install a Tow-Pro™ Elite brake controller, delivering a quality and reliable installation every time whilst protecting the integrity of the vehicle and avoiding the setting of fault codes or damage to the sensitive electronics.

TOW-PROLOOM KITS

MANUFACTURER	VEHICLE	KIT #	BARCODE
Ford	Ranger PXI, PXII & Everest	TPWKIT-001	9338628004072
