

THE POWER OF
REDARC

COMPLETE POWERDOCK INSTALLATION KIT

REDARC are pleased to release a new addition to the GoBlock accessory range; the Complete PowerDock Installation Kit.

The Complete PowerDock Installation Kit includes everything you need to install the PowerDock in the rear of a vehicle, providing your GoBlock with a reliable and secure charging solution.

The kit provides the necessary parts including pre-terminated wiring and fuses to connect the PowerDock in the rear of a vehicle to the start battery in the engine bay, making the installation of a PowerDock easier than ever.

A genuine Anderson connector and cable is also included to connect fixed or portable solar panels.

With everything included in the box, the Complete PowerDock Installation Kit is perfect for those performing a new PowerDock installation with no existing wiring.

Part No. PPSDOCKWK-002
