Honda	Mitsubishi	Volvo

**PART NUMBER: RERCB8**

As car technology advances, and the range of makes and models increases, the job of the automotive technician is becoming extremely difficult.

There are literally tens of thousands of diagnostic trouble codes used by manufacturers in modern vehicles.

**The Rellim Code Book 2019 (8th Edition)** is a valuable addition to any workshop and can be used in conjunction with your scan tool to help remove the mystery from trouble codes.

Each code is listed in numerical order including both generic and manufacturer specific codes, numerical and hexadecimal codes. All powertrain fault codes have a description of the code, an explanation of why the code has set and possible causes.

This book is the must-have companion to your scan tool. Huge range! Australian, Japanese, Korean, European, US.
