

NEW! HALOGEN & XENON HID HEADLIGHT REPLACEMENT BULBS

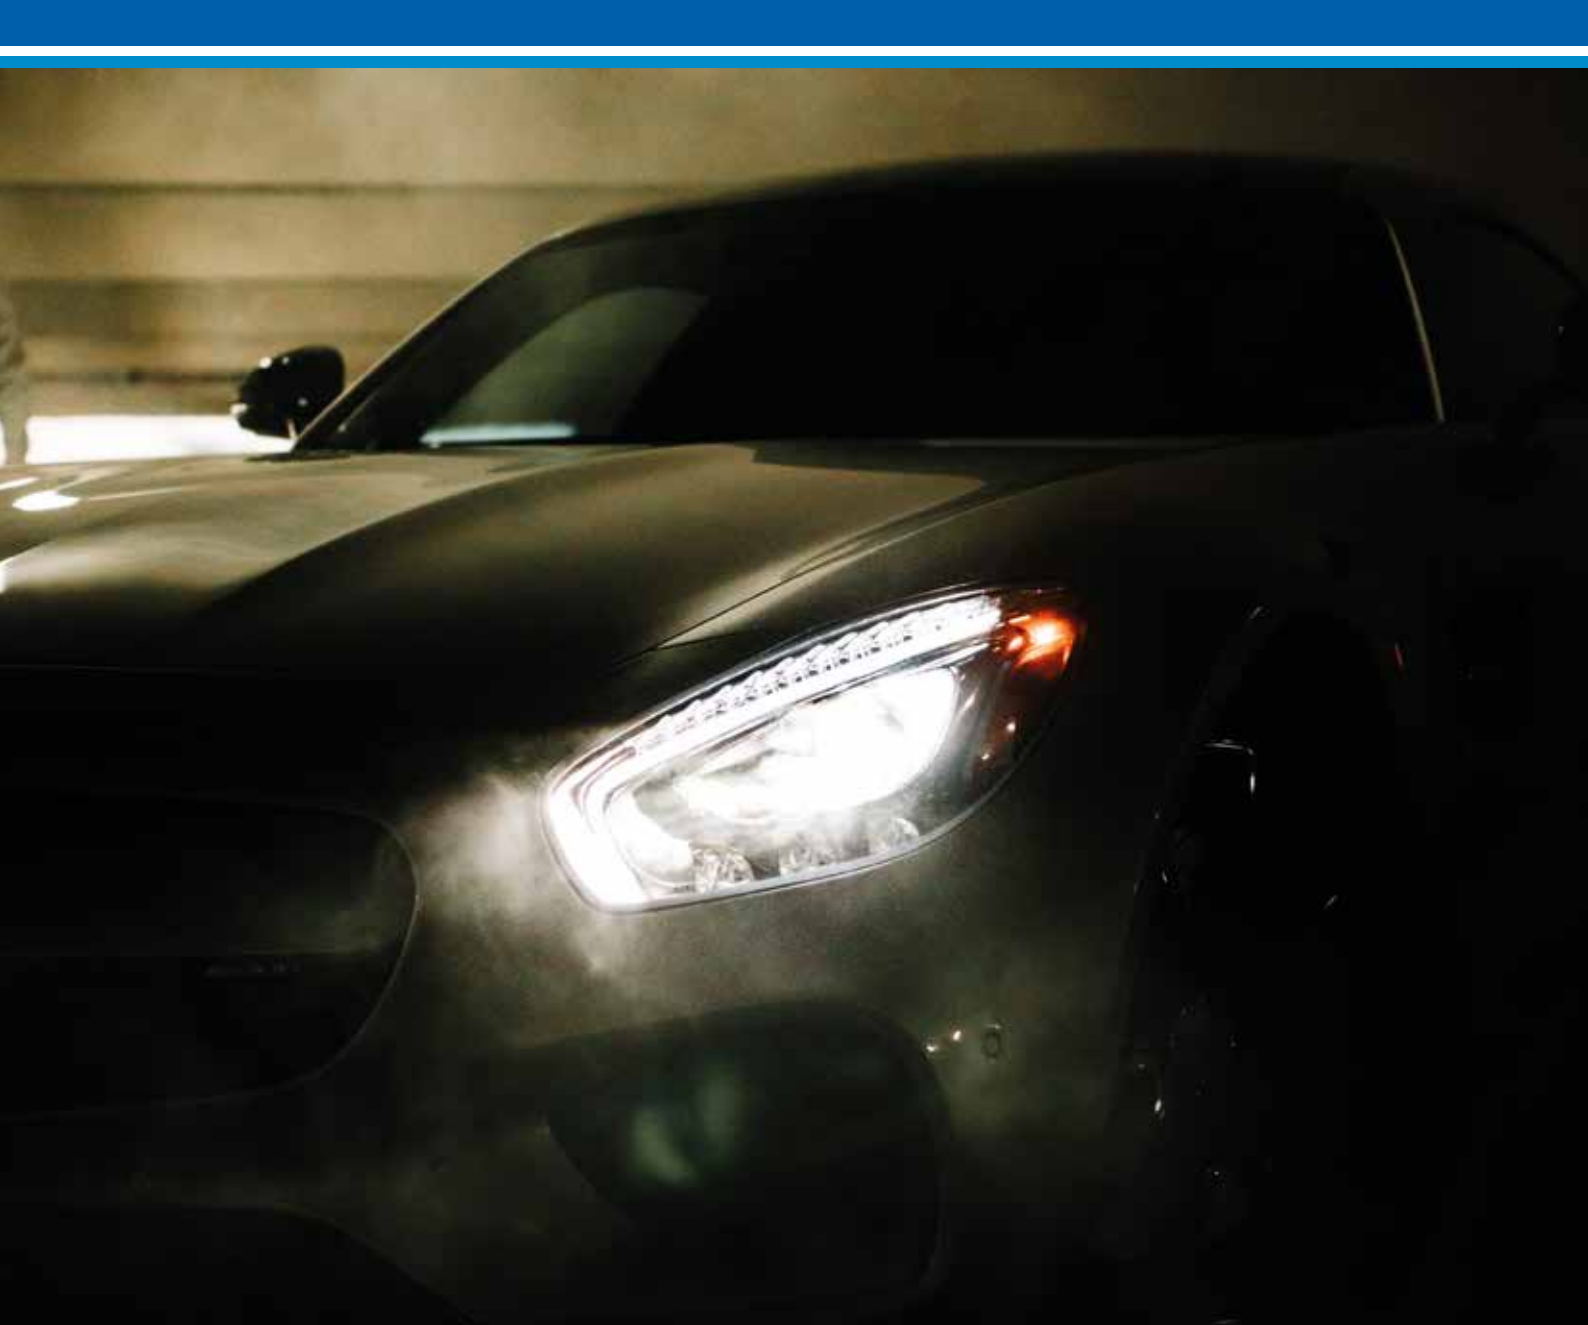

Ignite, a leading provider of automotive lighting solutions is proud to announce the launch of its new Halogen and Xenon headlight replacement bulbs. These bulbs are engineered with exceptional quality and produced to OEM specification, ensuring superior performance and reliability.

Ignite's new line of Halogen and Xenon headlight bulbs are produced from the same manufacturing line used by leading vehicle manufacturers, ensuring the highest level of excellence through ISO/IATF quality management systems.

With premium materials used throughout the manufacturing process thus meeting International OEM standards and certified with ECE and DOT certifications. Ignite headlight bulbs offer drivers a safe and legal lighting solution.

Now available in the Australasian aftermarket, Ignite's headlight bulbs provide a best-in-class replacement experience for enhanced visibility and safety on the road.

WHICH BULB TO CHOOSE?

LONG LIFE

These bulbs boast an extended Long Life range where possible, providing a lifespan of up to two times longer than the minimum ECE requirement of standard halogen bulbs. This impressive longevity makes them the preferred bulb of choice for many OEM car manufacturers, ensuring a consistent lighting experience over an extended period.

HALOGEN UPGRADES

UPGRADE bulbs are designed to give the driver better visibility and clearer illumination on the road. There are two categories in this range, MORE LIGHT and WHITER LIGHT bulbs.

XENON

IGNITE Xenon HID replacement bulbs allows drivers to replace single bulbs in vehicles that have XENON headlight technology.

12V HALOGEN LONG LIFE & STANDARD

Ignite offers Long Life bulbs as a standard 12V replacement (where possible).

Also available are Rally bulbs which offers a higher wattage over Standard & Long Life bulbs.

- Approved for Australian road use (ECE), excluding Rally bulbs
- Up to 2 x longer life compared to standard halogen

HALOGEN UPGRADES **PLUS 150%**

PLUS 150% - Providing up to 150% more intensity of light enabling the driver to see further down the road. (compared to a Standard & Long Life Bulb). The upgrade also offers a step up in whiter, clearer light compared to Standard & Long Life bulbs. The benefit of these bulbs will help drivers identify and react faster to safety signs and dangerous situations. The Ignite upgrade range are high performance bulbs that pushes the capabilities of normal Halogen bulbs to a higher extremity. This may affect the life time of the upgrade range compared to the standard halogen bulb.

- Approved for Australian road use (ECE)
- Optimised performance enabling the driver to see further and react faster
- Superior beam performance for extra safety

12 Volt - Plus 150%

Part Number	Globe Type	Base Type	Watts	Range	ECE Approved	Packaging
IGL2301	H1	P14.5s	55	PLUS 150%	Yes	Twin Box
IGL2240	H4	P43t-38	60/55	PLUS 150%	Yes	Twin Box
IGL2207	H7	PX26d	55	PLUS 150%	Yes	Twin Box
IGL2211	H11	PGJ19-2	55	PLUS 150%	Yes	Twin Box
IGL2213	HB3	P20d	60	PLUS 150%	Yes	Twin Box
IGL2214	HB4	P22d	51	PLUS 150%	Yes	Twin Box

HALOGEN UPGRADES **PLUS 200%**

PLUS 200% - Providing up to 200% more intensity of light enabling the driver to see further down the road. (compared to a Standard & Long Life Bulb). The upgrade also offers a step up in whiter, clearer light compared to Standard & Long Life bulbs. The benefit of these bulbs will help drivers identify and react faster to safety signs and dangerous situations. The Ignite upgrade range are high performance bulbs that pushes the capabilities of normal Halogen bulbs to a higher extremity. This may affect the life time of the upgrade range compared to the standard halogen bulb.

Standard/Long Life Bulb

Plus 200%
Ultra Vision

- Approved for Australian road use (ECE)
- The most powerful Halogen upgrade in the Ignite range
- Optimised performance enabling the driver to see further and react faster
- Superior beam performance for extra safety

12 Volt - Plus 200%

Part Number	Globe Type	Base Type	Watts	Range	ECE Approved	Packaging
