

# LIFEHAWK RECHARGEABLE HARD HAT LED LIGHT

**“BE SAFE AND BE SEEN”** Part # LH001

LifeHawk LED Hard Hat Safety Lights are designed to provide superior visibility compared to traditional safety gear. Equipped with built-in light-emitting diodes (LEDs), these hard hat lights offer illumination that not only allows the wearer to see in low light conditions but also makes them highly visible to others, particularly operators of heavy machinery.

In industries like mining and road construction, where poor lighting and limited visibility can lead to fatal accidents, LED hard hats serve as a beacon, ensuring that workers are seen well in advance.

## FEATURES
