LED HITCH STEP

The Hayman Reese LED Hitch Step is an easy-fit rear step with integrated, ultra-bright LED lights. This provides a solution to access hard to reach places on utes, vans and SUVs while lighting behind the vehicle when you need it most.

Its unique, non-slip, aluminium checker plate construction provides a safe solution for loading and unloading cargo. The LED Hitch Step comes pre-wired with a 7-pin flat plug to suit most vehicle configurations but can also be configured for specific vehicle requirements.

Features:

- Heavy-duty aluminium step with a 150 kg load capacity
- High powered ultra-bright LED light
- Plug-in ready; comes pre-wired with a 7-pin flat plug to suit most applications
- Multi-function switch configured to illuminate with vehicle reverse lights or park lights (where vehicle has been pre-wired for reverse)
- Ideal for additional light when reversing, or attaching a trailer in the dark
- Includes towball adaptor to suit standard flat sided and interlock towballs
- Suits most towbar tongues and towball mounts[^]
- Stays in place while you tow*
- 2 Year warranty

[^] May not be compatible with some reinforced (gusseted) towball mounts

* May have to be removed for tight turns, off road or if trailer arm has any attachments or modifications that are positioned below the coupling.
