

TRIDON ► OIL DRAIN SUMP PLUGS

SOMETIMES THE SMALLEST PARTS OFFER THE SIMPLEST SOLUTIONS!

Tridon Oil Drain Sump Plugs are designed as a direct replacement for your vehicle to ensure that a tight seal is achieved every time your car is serviced.

Popular modern vehicle manufacturers now utilize replaceable polymer plugs in their vehicles, which have become a consumable component.

It is recommended that these plugs are replaced at every service to ensure leak free operation of your vehicle.

- Oil plugs can be damaged by repetitive heat cycles & day to day running of your engine
- O-rings can deteriorate with repeated fitting leaving your vehicle prone to leaks

TRIDON OIL DRAIN SUMP PLUGS

SOMETIMES THE SMALLEST PARTS OFFER THE SIMPLEST SOLUTIONS!

Tridon Oil Drain Sump Plugs are designed as a direct replacement for your vehicle to ensure that a tight seal is achieved every time your car is serviced.

Tridon's new range of 34 oil drain sump plugs has been developed to cover over 10 million vehicles throughout the Australian & New Zealand market. Popular modern vehicle manufacturers now utilise both the original style sump plugs & the newer style replaceable polymer oil drain plugs in their vehicles.

- Tridon sump plugs are made of either high quality carbon steel or polymer & are supplied with o-rings or gaskets
- O-rings and plugs can deteriorate with repeated fittings leaving your vehicle prone to leaks
- Replacing your sump plug at every service ensures leak free operation of your vehicle
