

Brembo B-Quiet Brake Lubricant

Part No: G00075

The lubricant for high efficiency brakes

B-Quiet is the new Brembo lubricant available in the aftermarket product range.

It is applied on the contact surfaces between the pad and the brake caliper (on the bracket if it's a floating caliper). B-QUIET helps the braking system to work properly, avoiding any noise from arising and assures an enhanced part protection from corrosion.

Easy to spread

Thanks to its consistency, it spreads evenly on the backing plate without breaking up, maintaining its lubricating properties.

Its mineral composition, which is oil-based, has no metallic soaps and no fatty acids that make it non-conductive.

Brembo B-QUIET is also extremely resistant to washing and to high temperatures, because it is insoluble. Its non-corrosive properties also make it compatible with all metals.
