

PETRONAS Syntium™ Specialty Engine Oils

OIL IS AN ESSENTIAL COMPONENT!

In today's automotive industry, vehicle manufacturers collaborate with leading lubricant companies, like PETRONAS, to develop oil formulas that minimise emissions, reduce engine wear, and boost fuel economy. Gone are the days when a workshop could simply use a one-size-fits-all approach with 20W-50 mineral or 10W-40 semi-synthetic oils.

To ensure optimal engine performance, it's crucial to use the correct lubricant that meets or exceeds the OEM specifications for each vehicle during service. PETRONAS Syntium with °CoolTech™ lubricants offers a range of fully OEM-approved products, making it the ideal choice for meeting all engine service requirements.
