

DC-DC BATTERY CHARGER 12/24V - 15 AMP

Experience efficient and reliable charging with the latest in battery charging technology. The HULK Professional Series 15 Amp DC-DC Battery Charger offers advanced features designed for off-road enthusiasts and professional use.

KEY FEATURES:

Fully-Automatic Selection:

Charger automatically selects between Alternator or DC inputs without manual intervention, simplifying the charging process.

Multi-Chemistry Charging:

A versatile 7-stage switch-mode charging protocol supports all standard Lead-acid, GEL, AGM, Calcium, and Lithium auxiliary batteries.

Dual Charging Modes:

Able to operate effectively with both fixed voltage alternators (standard 12V or 24V systems) and variable voltage (smart) alternators.

Wide Input Range:

Accommodates a broad voltage input of 11 - 32 Volts, making it possible to charge from both 12V and 24V vehicle systems.

Robust and Durable:

IP67 rated, ensuring complete protection against dust and water ingress, and operating reliability in extreme temperatures ranging from -20°C to +85°C.

The HULK Professional 15 Amp DC-DC Battery Charger is perfect for:

Smaller Batteries:

Ideal for maintaining and charging smaller auxiliary batteries used in small-scale applications.

Light-Duty Equipment:

Reliable for powering camping gear, navigation devices, and other light-duty electronics in recreational vehicles.

Off-Road Adventures:

Suitable for off-road vehicles or boats with modest power storage needs, to ensure necessary equipment stays charged.

The HULK Professional DC-DC Battery Charger is also available in 20A 24V, 25A 12/24V or 40A 12/24V models.
