

NOCO XGRID Solar Panel & Power Storage Range.

NOCO XGrid® is an innovative brand of portable solar power solutions designed for today's mobile consumers. XGrid is derived out of the concept of cross-marketing to multiple consumer groups.

XGrid does not just appeal to Automotive centric consumers, but, fishing, camping, RVing, ATVing, motorcycling, hiking as well. XGrid provides retailers the unique opportunity to participate in the largest consumer market in the world- mobile users.

Solar power is only as good as your ability to collect and manage the power. Solar energy is available and free everyday. The secret is storing the energy to consistently power the devices you need.

Collect + Regulate + Store

All NOCO XGrid® Portable Solar Power Solutions utilize the highest efficiency solar cells, charge regulation and lithium-ion technology.

Advantages

- Output power efficiency is very high (~ 18%) when compared to traditional thin film technology around 6-8%
- Foldable and flexible waterproof solar cells for a compact, durable and lightweight design
- Precision charge regulation with Pulse Width Modulation (PWM) for precision charging and built-in battery desulfation for capacity recovery
- IP65 lithium-ion battery packs features some of the most durable and water resistant products on the market
- All products integrate with NOCO X-Connect Accessories for simple and easy plug-n play-accessories sharing

- **Modular design allows for easy panel stacking for additional power needs; ~daisy chain up to 12 separate solar panels**

XGS4AUTO

The XGS4AUTO is an ultra-portable 4W smart solar charging solution for cars, trucks, boats, motorcycles, ATVs, lawn mowers, snowmobiles and more. Ultra-compact design, powerful enough to maintain and automatically recover batteries.

XGS4USB

The XGS4USB is an ultra-portable 4W smart solar charging solution that charges virtually any USB powered device, including smartphones, HD cameras, GPS and more. It's extremely compact and lightweight, which makes it perfect for any adventure.

XGB6

XGS4USB

XGS9USB

The XGS9USB is an ultra-portable 9W smart solar panel and rugged 250 lumen LED flashlight. It's perfect for recharging smartphones, HD cameras, GPS and more. The XGB3L's compact, yet powerful, LED flashlight provides hours of essential light.

XGB3

The XGB3 is an extremely durable and waterproof (IP65) portable USB battery pack for smartphones, tablets, cameras, GPS devices and more.

XGB3L

The XGB3L is an extremely durable and waterproof (IP65) portable USB battery pack and tactical grade LED flashlight rated at 250 lumens.

XGB6

The XGB6 is an extremely durable and waterproof (IP65) portable USB battery pack for smartphones, tablets, cameras, GPS devices and more.

XGB12

The XGB12 is an extremely durable and waterproof (IP65) portable USB battery pack for smartphones, tablets, cameras, GPS devices and more.

Modular design allows for easy panel stacking for additional power needs; ~daisy chain up to 12 separate solar panels
