

# TIEGEAR

Our Steadfast Guy Rope has been designed for a secure hold and staying untangled. This product works with all Caravans, 180°/270° awnings, gazebos, tents and any other outdoor equipment you need.

We redesigned the guy rope to be faster & easier to use whilst giving a more secure hold through our cast alloy tensioner which allows the 4m of UV stable nylon rope to be secured at any length. Simply wrap the remaining rope around your hand and place it into our built-in storage bag to make sure your campsite stays neat & tidy.

## STEADFAST GUY ROPE

Part Number: GR01

### MEASUREMENTS & SPECS

4m of UV Stable Nylon Rope  
47cm long (packed away flat)  
240g

The heavy-duty spring allows for flex in the tie down system, which ensures strong gusts of wind are absorbed and pegs remain securely fixed to the ground. The spring has a carabiner at each end allowing for it to be wrapped around items such as; bull bars, bollards, trees etc.

It has also been designed to be able to wrap around the drum of a caravan awning providing a secure and safe connection point for the Guy Rope. The soft materials ensure there is no risk of scratching or damage to the awning.

## STEADFAST SOFT SPRING

Part Number: HD01

### MEASUREMENTS & SPECS

45cm Un-Stretched Bungee

STEADFAST

## CARAVAN PACK

Part Number: AWN02

Secure your adventure faster & easier with our Awning 2 Pack. With 2 Guy Ropes & 2 Soft Springs this pack is perfect for securing your Caravan awning. With the help of the Gear Bag, you can keep everything organised.

The Steadfast Gear Bag is constructed from a high-quality acrylic canvas and mesh to make it robust and breathable, which gives you the confidence to pack up your ropes soaking wet knowing that they won't get mouldy.

## HARD TERRA

Part Number: HTP

The Steadfast Hard Terra is made from Forged 304 Stainless Steel and with the masonry tip, it makes them the ultimate durable and reliable option for a range of hard terrain.

With our rotating double hooked head, it's easy to line up the hook in the direction you need to tie down. It also means that you can use one peg for multiple tie downs in opposite directions.

*(Driver sold separately)*

### MEASUREMENTS & SPECS
