

Advanced Chemical - Technical Products

The TUNAP GROUP is an international manufacturer of aerosols, lubricants and cleaners for industrial and technical applications. With innovations and reliable products "Made in Germany" from its own development and production as well as a comprehensive international direct sales organization.

TUNAP is an international development and service partner for car dealerships and workshops and cooperates with almost all major vehicle manufacturers. The portfolio includes chemical-technical products for maintenance as well as repairs and problem solutions for all vehicle areas: from the engine, brakes and bodywork to the air conditioning system and the maintenance and care of interiors. TUNAP Automotive's best-known product is the air conditioning cleaning system "airco well®".

974/984 Injector Direct Protection

Due to the innovative ROA2 technology Level 1, microflex® 984 Injector Direct Protection effectively protects injectors against fuel-related deposits with a molecular-active protective film. This keeps fuel consumption and emissions low, and the injectors are optimally protected.

955 Oil System Protection BN

An innovative engine oil additive with nanostructural alpha-BN. Restores the surface of components in engines and compensates for wear, reduces noise and fuel consumption, and improves the corrosion protection provided by the oil. Ideal for lasting optimisation of engine performance and service life.

1107537 300ml
1106201 950ml

957 Engine Interior Cleaner

Effectively removes oil sludge deposits, protects the engine from damage as a result of blocked oil channels and prevents contamination of new oil during an oil change.

Ideal for piston ring compression loss and hydraulic valve lifter knocking.

- Free of VOCs
- Contains low-viscosity cleaning agents to deliver outstanding cleaning results
- Contains additives to lubricate components during the cleaning process
- Does not contain any chlorine, phosphates, nitrates or heavy metals
- Removes oil sludge deposits from the engine oil system
- Protects the engine from damage as a result of blocked oil channels and bore holes
- Can be disposed of with the used oil

1107593 400ml

979/989 Injector Direct Cleaner

Reliably cleans fuel-related deposits from injectors using ROA2 technology Level 2. When used at every service, Injector Direct Cleaner provides enhanced performance and significantly reduced exhaust emissions.

- Deposits on injectors are broken down and cleaned away
- ROA2 level 2: Ideal for heavy contamination

1106676 950ml - 989 - DIESEL

AC Pressure Cup Spray Gun

Special tool for cleaning and rinsing the air conditioning system evaporator.

1401216

933 Valve Clean Granulate

Special cleaning granulate for intake and exhaust valves and for the surrounding ducts. It provides fast, effective cleaning that is gentle on materials with its specific granulate grain size and geometry, which guarantees the optimal performance of the valves.

**Applicator Gun to suit:

1103683 1L

936 Neutralising Solution

Specially developed for microflex® 933 Valve Cleaning Granulate. It dissolves remaining particles from the cleaning granulate in the valves quickly and reliably so that no solid components enter the combustion chamber and optimum engine performance is guaranteed.

1107012 200ml

925 EGR System Cleaner

Introducing our solution for cleaning smaller components in the intake and exhaust system, such as EGR valves. Our product offers an excellent cleaning effect on carbonaceous residues while being solvent-free and non-flammable. It ensures thorough cleaning for optimal performance and longevity of your vehicle's essential components.

1100400 1L

926 Carbon Remover

The perfect solution for cleaning larger components in the intake and exhaust system, such as intake manifolds and EGR coolers. This product offers an excellent cleaning effect on carbonaceous residues and is formulated to be solvent-free and non-flammable.

1106977 200ml

965 System Active Substance

A formulation specifically for hybrid vehicles with petrol engines. The system active ingredient protects and cleans injectors and stabilizes the fuel during longer downtimes that are typical of hybrids.
