

TEKNOFIBRA®

WORLD LEADING THERMAL INSULATION

TOOLS & EQUIPMENT

POWER GENERATION

MOTORSPORT

MINING

TRANSPORT

AVIATION

Used around the world in motorsport such as Formula 1, Supercars and GT Racing, and in aviation and general industry, Teknofibra® have an innovative range of thermal insulation products for various applications. A carbon fibre thermal heat barrier technology provides exceptional heat protection at up to 75% weight reduction over traditional mineral fibre based products, but with the added security of being manufactured using non-toxic materials.

Search Teknofibra® on iShop for a full range of products!

KEY ADVANTAGES OF TEKNOFIBRA®

- Total non-toxic and physiological safety
- Incomparable thermal conductivity up to high temperatures
- Does not burn and does not produce toxic or hazardous emissions in case of fire
- Excellent acoustic performance with sound absorbing
- Adaptable and mouldable on any surface
- With this performance, it is the lightest on the market

Teknofibra® Contact is capable of reaching temperatures up to 1000°C while only transferring 56°C on the other side.

Surpasses aviation and motorsport requirements.

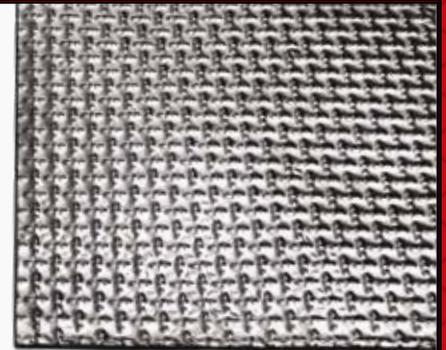

ALUMINIUM TAPE

Heat Reflective

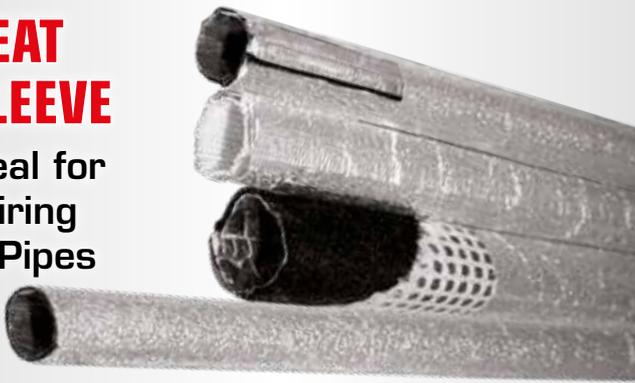

SELF ADHESIVE RIGID CONTACT

Resistant up to 1000°C

HEAT SLEEVE

Ideal for Wiring & Pipes

ADHESIVE HEAT REFLECTIVE PANEL

Resistant up to 400°C
