

AIR COMPRESSORS

HULK 4X4 is proud to release a new range of high-performance 12V Air Compressors, engineered to deliver reliability, speed, and efficiency in the toughest off-road conditions. Perfect for inflating tyres, powering air tools, or general workshop use, these new models combine robust design with advanced features for maximum performance and durability.

FEATURES ACROSS THE RANGE

- 12V Operation – Compatible with standard vehicle electrical systems for convenient, portable use
- 150PSI Maximum Pressure – Capable of inflating large 4WD tyres and accessories quickly and efficiently
- Oil-Free Design – Maintenance-free operation with clean and consistent airflow.
- Replaceable Air Filter – Extends compressor life and helps maintain peak performance
- Circuit Breaker & In-Line Switch – Provides safety protection and user-friendly power control
- 8M Rubber Hose with Inline Gauge – Offers a long reach for easy tyre inflation around vehicles
- Solid Base Plate with Rubber Suspension Feet – Minimises vibration and noise for stable operation
- Heavy-Duty Alligator Clips – Ensures a secure and reliable connection to vehicle batteries
- Carry Bag with Auxiliary Nozzles – Convenient for transport and storage; includes nozzles for tyres, airbeds, and inflatables accidental adjustments.

AIR COMPRESSORS

HU160 – 160L AIR COMPRESSOR

The HULK 4X4 160L AIR COMPRESSOR delivers **160 litres per minute (5.65 CFM)** of airflow, providing **fast and efficient inflation** ideal for recreational and 4WD use. Its **compact and lightweight design** makes it easy to store and transport, ensuring convenience for users on the go. With a **maximum current draw of just 45 amps**, it offers efficient performance without overloading smaller vehicle electrical systems.

Perfect for recreational 4WD users, weekend adventurers, and light-duty applications, the HU160 combines portability, performance, and reliability in a rugged, go-anywhere package.

Digital pressure setting

HU300 – 300L AIR COMPRESSOR

The HULK 4X4 300L AIR COMPRESSOR takes air performance to the next level, delivering a high **300 litres per minute (10.6 CFM) flow rate** for rapid inflation of large 4WD tyres and air tools.

Its digital pressure setting allows users to set precise inflation targets with automatic shut-off once the desired pressure is reached, ensuring both convenience and accuracy. With a **90-amp maximum current draw**, the HU300 provides powerful, heavy-duty performance suited to demanding applications.

Ideal for serious off-roaders, workshops and tradespeople, the HU300 is built for those who demand maximum output and professional-grade reliability from their air system.

Specification	160L Air Compressor	300L Air Compressor
Voltage	12V	
Flow Rate	160LPM (5.65 CFM)	300LPM (10.6 CFM)
Maximum Pressure	150 PSI	
Cylinder Size	60mm	
Max Amperage Draw	45A	90A
Pressure Control	Inline Gauge	Digital Pressure Setting
Circuit Protection	Circuit Breaker & In-Line Switch	
Air Filter	Replaceable	
Lubrication	Oil-Free Design	
Air Hose	8M Rubber Hose with Inline Gauge	
Base Mounting	Solid Base Plate with Rubber Suspension Feet	
Power Connection	Heavy-Duty Alligator Clips	
Accessories	Carry Bag with Auxiliary Nozzles	
Primary Use	General off-road and recreational	Heavy-duty, trade, and 4WD applications
Part Number	HU160	HU300
