

LED CANBUS KIT

Complete canbus unit with built in resistor

- Now has built-in resistor, compact, saves you from having to buy two separate products.
- Ideal for vehicles where the electronic system conflicts with LED headlight globes.
- Simulate halogen bulbs signal feedback.
- Non-Polarity input.
- Generates less excess heat than a resistor. Temperature less than 80 degree on exterior case

Specification

- Temperature: -40°— +85°
- Current: 13.5V, 0.5A
- Rated power: 13.5V, 6.5W

Volts	Bulb Type	Part Number
12V	H4	IGL9804EC
	H7	IGL9807EC
