

THE POWER OF
REDARC

TOW-PRO LINK

NEW PRODUCT RELEASE

The towbar-mounted Tow-Pro Link is the ultimate solution for convenient and safe trailer braking.

The Tow-Pro Link is designed for streamlined installation. With the included harness, new Tow-Pro controller app, and USB-A powered remote, there's no need for any vehicle modification, delivering installations up to 50% faster than other leading brake controllers. For those who prefer REDARC's classic Tow-Pro remote head, a drill-mount variant is also available.

Tow with confidence thanks to SwayStop Plus™ trailer sway stabilisation, while the class-leading 6-axis sensor ensures smooth braking, precise control, and fast calibration.

Tow-Pro Link – where streamlined setup meets ultimate towing safety.

EBRHX-ADH

Tow-Pro Link with USB Remote

Not suitable for Ford vehicles featuring AEB. Including Ford PX3 Ranger and Everest (MY18 onwards)

TOW-PRO LINK

TOWBAR-MOUNTED ELECTRIC BRAKE CONTROLLER

ADVANCED TRAILER SWAY RECOVERY

New SwayStop Plus delivers one-touch sway control. Simply press and release the button; the Tow-Pro Link then activates the trailer brakes until the sway incident is resolved, allowing you to keep both hands on the wheel.

TWO BRAKING MODES

Everyday Mode (proportional braking) for most on-road towing conditions, and Manual Off-road Mode for more challenging conditions (steep descents, sand, etc.).

STREAMLINED INSTALLATION

With a USB powered remote and Bluetooth phone app, the Tow-Pro Link delivers installations up to 50% faster than other leading brake controllers.

SMOOTH BRAKING PERFORMANCE

The only 6-axis sensor on the market delivers unmatched control and smooth braking.
